CAREER OBJECTIVE

A highly skilled former application developer with over 3 years of work experience, seeking a challenging career in the field of Data Analytics and IT consulting at a reputable organization.

EXPERIENCE

SEP 2019-Present | Graduate Teaching Assistant | NUI, Galway

- Tutored Java for 110 students in the School of Computer Science and Technology.
- Mentored troubled students and helped them fully comprehend to the taught curriculum in the laboratory.

JUL 2016-AUG 2019 | Applications Developer | Bank of New York Mellon

- Skilled application developer specializing in Java, Spring, Hibernate and Angular framework.
- Contributed majorly in Multihub project, converting mainframe screens to distributed components for which I was honoured with *'Take a Bow Award'*.
- Designed and developed Enterprise Payment Hub V2 application, a gateway for all cash settlements within the bank.
- Spearheaded an initiative to mitigate risk and resiliency by developing a POC to automate functional test cases in lower environment as part of the Greenfield (risk management) initiative. Received a "*Bravo Award*" for the effort and the project was outsourced to CTS to develop a common application for all teams across the Bank.
- Was part of the ERI Common Interface team, the very first team to migrate applications on a Docker container environment (Greenfield) amongst all the LOBs within the Bank to mitigate risks associated with hardware nearing end of service life.

FEB 2012-JUN 2012 | Applications Developer Trainee| Bank of New York Mellon

- Contributed effectively in an Intranet Application to understand financial markets and investment banking domain by simulating a stock market environment.
- Attained valuable exposure with respect to the job role within the industry by attending workshops and learning new technologies.
- Worked on POCs- Car pooling and CSR application which was rolled out later to all the employees in the organization.

EDUCATION

2019-2020 | M.Sc in Artificial Intelligence | NUI, Galway

Modules

- Machine Learning
- Deep Learning
- Natural Language Processing
- Image Processing

2012-2016 | B.Tech in Information Technology | Anna University, Chennai
CGPA: 8.22 | First Class
Project: Enabling Secure Acoustic Communications between Smartphones

Designed and developed project to transfer messages through sound waves at a high frequency as an alternative for Bluetooth.
Modules

- Core Java
- Web Design and Development
- Software Engineering and Quality
- Database Management Systems
- Cryptography and Network Security
- Data Structures Assurance

SKILLS

TECHNICAL

Core Essentials: Java, Python | *Enterprise Technology:* Spring, Spring Boot, Apache Camel, Hibernate | *Middleware:* IBM MQ | *Build Tools:* Maven, Jenkins | *Repository:* GIT, Subversion | *Testing:* Junit, Mockito | *Front-End Technology*: Angular | *ML Frameworks:* Sklearn, SparkML

OVERVIEW

Was part of the Money Management Division where cash settlements happen within the Bank. A microservices architecture which made use of the above-mentioned technologies to develop and deliver various applications to our clients. Apart from this I have intermediate knowledge in scripting frameworks such as Javascript and Node Js and Unix environment as well.

SOFT SKILLS

Communication: Excellent communication enhanced by working with clients across the globe.
Leadership: Mentored trainees and students at both work place and university.
Team Player: Worked and helped members across various LOBs within the bank. Received "Applause Award" from the organization.

INTERESTS

- Gaelic Football: The enthusiasm to try out a new sport got me a place in the International student's Gaelic football team at NUIG.
- Soccer: Former local club player at Stars FC and BNY Mellon FC in Chennai. A loyal supporter of Real Madrid.
- Cricket: Played for BNY Mellon cricket team, won Corporate tournament conducted in Chennai.
